Introduction to TensorFlow for Artificial Intelligence, Machine Learning, and Deep Learning

Completed by **PRATIK YUVRAJ YAWALKAR**

May 30, 2022

4 weeks, 4-5 hours/week

Grade Achieved: 100%

PRATIK YUVRAJ YAWALKAR's account is verified. Coursera certifies their successful completion of Introduction to TensorFlow for Artificial Intelligence, Machine Learning, and Deep Learning

Programming Assignment: Housing Prices

Passed · 100/100 points

First programming assignment
This is your first programming assignment for this course.

Learn more Dismiss

Deadline The assignment was due on May 2, 12:29 PM IST
You can still pass this assignment before the course ends.

Launch Notebook!

Instructions My submissions Discussions

Great! You've come a long way already! Now it's time to do an exercise in programming. Earlier this week, you saw a 'Hello World' in Machine Learning that predicted a relationship between X and Y values. These were purely arbitrary, but it did give you the template for how you can solve more difficult problems. So, for this exercise, you will write code that does a similar task -- in this case predicting house prices based on a simple, linear equation.

To submit your Jupyter Notebook for grading, please click the `Submit Assignment` button while in the notebook.

Programming Assignment: Implementing Callbacks in TensorFlow using the MNIST Dataset

Passed · 100/100 points

Deadline The assignment was due on May 9, 12:29 PM IST
You can still pass this assignment before the course ends.

Opened ✓

Instructions | My submissions | Discussions

Now that you've worked through creating a basic computer vision scenario using TensorFlow to recognize fashion, you're ready to do this weeks assignment -- and that is to build a neural network that recognizes handwriting digits! You've covered everything you need to succeed, so give it a try!

To submit your Jupyter Notebook for grading, please click the `Submit Assignment` button while in the notebook.

Programming Assignment: Improve MNIST with convolutions

Passed · 100/100 points

Deadline The assignment was due on May 16, 12:29 PM IST
You can still pass this assignment before the course ends.

Launch Notebook!

Instructions | My submissions | Discussions

Ok, now it's time for this week's assignment. In the class, you learned how to enhance the Fashion MNIST neural network with convolutions to make it more accurate. Now it's time to revisit the handwriting MNIST dataset from last week, and see if you can enhance it with convolutions.

To submit your Jupyter Notebook for grading, please click the Submit Assignment button while in the notebook.

Programming Assignment: Handling Complex Images

Passed · 100/100 points

Deadline The assignment was due on May 23, 12:29 PM IST
You can still pass this assignment before the course ends.

Launch Notebook!

Instructions | My submissions | Discussions

Now it is time to create your own image classifier for complex images. See if you can create a classifier for a set of happy or sad images.

To submit your Jupyter Notebook for grading, please click the `Submit Assignment` button while in the notebook.

IMPORTANT FOR SUCCESSFUL GRADING:

- Don't forget to save your notebook before submitting!

- Don't delete cells as these include important metadata for grading.

- Fill out your solutions within the provided spaces. You can add new cells but these will be omitted by the grader.
